

From Indian Creek Church to Crouse Baptist Church

Crouse Community History & Photo Project

In earlier installments we have followed the stories of Antioch Methodist, St. Paul's Lutheran, and Crouse United Methodist churches that have stood in and around the community for generations. This week we turn to Crouse Baptist Church, a congregation whose roots lie a short distance away in what was the Indian Creek mill village and whose present building was raised by its own members after the village was displaced in the mid1950s.

Very little written history of the church survives. Most of the generation that would have known the details have passed. What remains comes from personal notes of members, a single known photograph of the original building in the Steve Bailey Collection, and the broader record of the Indian Creek mill village.
